## **DETAILED ACTION**

### ***Specification***

1. Claim 11 is objected to because of the following informalities: The claim(s) contains subject matter which was not clearly described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Applicant states that the predetermined standard value is also referred to interchangeably within the patent as predetermined temperature, predetermined value, and standard inside temperature. In order to avoid confusion and misinterpretation, it is strongly suggested that Applicant uses the term consistent with the specification; such as predetermined temperature, predetermined value, and standard inside temperature. Appropriate correction is required.

### ***Reissue Applications***

2. The original patent, or a statement as to loss or inaccessibility of the original patent, must be received before this reissue application can be allowed. See 37 CFR 1.178.

### ***Allowable Subject Matter***

3. Claims 1-10 are allowed.

4. Claim 11 would be allowable if rewritten or amended to overcome the objection set forth in this Office action.

### ***Conclusion***

5. This application is in condition for allowance except for the following formal matters:  
Items 1 and 2 of this Office Action.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
